DETAILED ACTION

Remarks

1. In response to communications files on 2-September-2005, claims 1, 10, 19, and 25 are amended per applicant's request. Therefore, claims 1-14, 16-26, and 29-34 are presently pending in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Van Huben et al. (U.S. patent 6,484,177).

As to claim 1, Van Huben et al. teaches in a directory server containing heterogeneous directory entries, a method of hierarchically navigating the entries (see column 2, lines 6-11; column 5, lines 33-35; and column 14, lines 13-21) comprising the steps of:

creating one or more directory views (see abstract and column 1, lines 8-9);

organizing the directory views into a hierarchy using only information concerning the entries (see column 2, 51-56, column 8, lines 45-51; column 12, lines 56-59; and column 15, lines 54-56); and

using one of the directory views that is most appropriate for navigating to the entries (see abstract and column 1, lines 8-17; column 2, lines 54-56; and column 15, lines 54-56).

As to claim 2, Van Huben et al. teaches wherein the entries do not need to be physically in any particular place (see column 7, lines 12-14; column 7, lines 40-59; and column 11, lines 37-38).

As to claim 3, Van Huben et al. teaches wherein the directory server may have a flat directory information tree (see column 2, lines 23-26; column 7, lines 49-52; column 13, lines 63-65; and column 20, lines 31-35).

As to claim 4, Van Huben et al. teaches wherein the existence of the directory views is transparent to a client of the directory server and the client is not required to have special knowledge of the directory views to use them (see column 11, lines 47-52 and column 12, lines 16-18).

As to claim 5, Van Huben et al. teaches wherein each of the directory views begins with an ordinary entry (see column 2, lines 12-17 and column 12, lines 56-59).

As to claim 6, Van Huben et al. teaches wherein each of the directory views belongs to a specific object class that contains a filter attribute, the filter attribute containing a filter that describes the views (see column 11, lines 23-30 and column 16, lines 20-29).

As to claim 7, Van Huben et al. teaches wherein the filter attribute is omitted from the views to facilitate a hierarchical directory structure (see column 16, lines 30-31).

As to claim 8, Van Huben et al. teaches wherein each of the directory views comprises sub-views which provide a subset of the views (see column 2, lines 26-36).

As to claim 9, Van Huben et al. teaches wherein the sub-views comprises different subject domains from the directory views (see column 9, lines 41-49).

Allowable Subject Matter

4. Claims 10-14, 16-26, and 29-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
